Pole Mount Option
Epoxy Mastic Finish
EP-4 Connectors
& 4-Position Terminal Strip

GENERAL DESCRIPTION

The Clair Brothers FF2-H is a compact speaker designed for applications that require high output in close proximity or a limited space.

The FF2-H measures just 8 inches high and less than 22 inches wide. The enclosure provides an unobtrusive option for listeners who do not have full benefit of the house PA or who require a near field monitor.

The FF2-H has a nominal coverage pattern of 90° x 60° and is rotatable for horizontal or vertical cabinet arrangements. The low/mid frequency section utilizes a single 8" driver capable of handling 250 watts.

The FF2-H speaker is ideal for theaters, houses of worship, cruise ships and auditoriums. The cabinet is engineered to interface successfully in any staging environment as either a portable or permanent installation model. The cabinet

provides clear, distortion-free reproduction of both speech and music program material.

As with all Clair Brothers products, the FF2-H is constructed of the finest Baltic birch plywood. The FF2-H weighs only 31 lbs. and features powder coated aluminum end caps to minimize cabinet wear for long life.

The speaker grille is constructed of high grade 14 gauge perforated steel with a durable powder coated finish and reticulated foam back.

ARCHITECT AND ENGINEER SPECIFICATIONS

The loudspeaker contains a two-way active, or optionally passive, system featuring a total of two drivers. The low/mid frequency section shall consist of one 8" driver capable of handling 250 watts of pink noise with a 6 dB crest factor for 8 hours (as per EIA RS-426-A standard). The high frequency section shall consist of a 1" exit, 1.7" voice coil diameter compression driver mounted on a 90°H x 60°V rotatable horn. The driver is capable of handling 120 watts (1kHz to 18kHz) of pink noise with a 6 dB crest factor for two hours (as per AES-1984 and ANSI S4.26-1984 standards). The enclosure shall be constructed with 18mm, 13-ply and 12 mm, 9-ply Baltic Birch and covered with a durable black epoxy mastic finish. The dimensions shall be 8.00" high, 21.94" wide, and 8.54" deep. The system weight shall be 31 lbs. for the active model and 34 lbs. for passive. The loudspeaker system shall be the Clair Brothers FF2-H, or FF2-HP, loudspeaker.
